What's New in the Beautiful Strongholds Free Screensaver?

Down to its basics, the app is nothing more than a screensaver that plays a slideshow of wallpapers of old strongholds, castles, and fortresses, but from the moment you see them, the sheer complexity of the pictures will make you forget about the app's simplicity. Explore ancient castles, battlements, and forts that once stood as the proud symbols of one of humanity's greatest achievements. Take a journey back in time as you explore these ancient structures while they still stand tall in the heart of a nation. Indulge yourself in these rich images as you watch them pan by every 20 seconds. You can also set them to come one by one, keep them on a slideshow, or go through them in random or in chronological order. Customize the slideshow The slideshow can be turned on or off, it can even be set to stop for a set period of time to pause the pictures and give you the time you need to discover the amazing history of these places. You can also set the slideshow to play all the images in a portrait or landscape format. Some of the settings that can be customized are image keep and transition time, and whether you want to built-in clock to be displayed in 12h or 24h formats.

Issues found during testing During the setup process, you have to pay extra attention during the setup wizard as the app offers to change the homepage and change the default search engine for your web browsers, but also download and install software that the program does not require to fully function. Currently, with the rise of 4K monitors, this app doesn't quite meet quality standards anymore, as some of the wallpapers show signs of pixelations on monitors with a 1920 x 1080 resolution

BlackBerry Bridge support Internet browsing Full Screen mode support Auto Power Off Buy Premium Account for download with full speed and immediate access. You must have Premium Account to download this app,contact us if you need help.

Q: Using log function to scale down response I'm trying to scale down the response that I get from Google Places API with Android. I want to reduce the size of the response so that the app doesn't consume as much data as it normally would. Here is what I'm doing with the code below:

```
private static final String API_KEY = "AIzaSyDwUduVrJWxM4OGb3ZV7vnW2lnPVQ8NQ"; private static final String APP_ID = "1:86964126661:android:ffffff:ffffff:ffffff"; private static final long INITIAL_RESPONSE = 5000; String url = "
```
