Microsoft Volume Activation Management Tool Serial Key

VAMT is a Microsoft Volume Activation Management Tool that allows organizations to manage the activation of their Windows Vista and Longhorn Server computers using Multiple Activation Key (MAK) keys. A Multiple Activation Key will perform a one time activation of PCs against Microsoft. Once the computers are activated they require no further communication with Microsoft. The number of computers that can be activated with a specific MAK is based on the type and level of the organizations's volume license agreement with Microsoft. [?] The Volume Activation Management Tool is built in VBScript and uses a Microsoft Activation Web Service to automate the activation process. [?] VAMT allows you to view the current number of activated MAK keys, the number of remaining MAK activations and to export a well formed XML file to a disconnected environment scenario. [?] VAMT will allow the customer to add a new MAK and specify if it should be used for the current computer or all computers associated with a MAK. The user can also view and delete MAK keys. Hi, I just bought a computer yesterday and have a multi-MAK activator and I want to activate some of the computers before shipping, can I do that using the Activation Tool. thanks Most computers come with a standard MAK but occasionally you may find the MAK for a single machine does not register successfully. If that is the case, follow these instructions to ensure your MAK key is registering. Hi, I'm trying to follow the steps you've outlined in your post but my computer does not have access to the internet. I've googled around and have looked at several sites such as this one: But I'm having no luck at all. Any suggestions? Hi. I just used the VAMT to activate my computer, which took a while, but it worked great. I have a bunch of computers that I need activated, so I'm looking for a way to activate them all at the same time. Can I do that? Hi - I've been using VAMT and it has been working great for me on a couple of occasions, but I was wondering if there's a way to make it so it automatically re-activates
